

# Communication Initiative

Who should take the initiative to initiate privacy mediation?

WHO?

## The user

A privacy mediating procedure can be designed in a way where the user of the camera device or the camera device itself (here: Tom and his smart glasses) proactively initiates privacy mediation. Then, a verbal request or a computer-generated message is transmitted from the camera device to other participants (here: Margit, Lena, Alex). Recipients could ignore the message, acknowledge it or react to it (e.g., by sending a response).

# Communication Initiative

## Impulses

What happens if someone's response to my smart glasses' inquiry is that they do not want to be recorded? Am I responsible for protecting their privacy?

There are cards to help you finding an answer to Tom's questions. Have a look at these categories:

Enforcement: **Kind of Enforcement**

Enforcement: **Obligations**

Implementation: **Compliance**

Responsibility: **Responsible Party**
